Milestone 1

Flow

Activity 1: Create a Flow to generate a Catalog Task after the service request is approved and assign it to the Hardware group

1. Open ServiceNow.
2. Click **All** and search for **Flow Designer**.
3. Click **Flow Designer** under **Process Automation**.

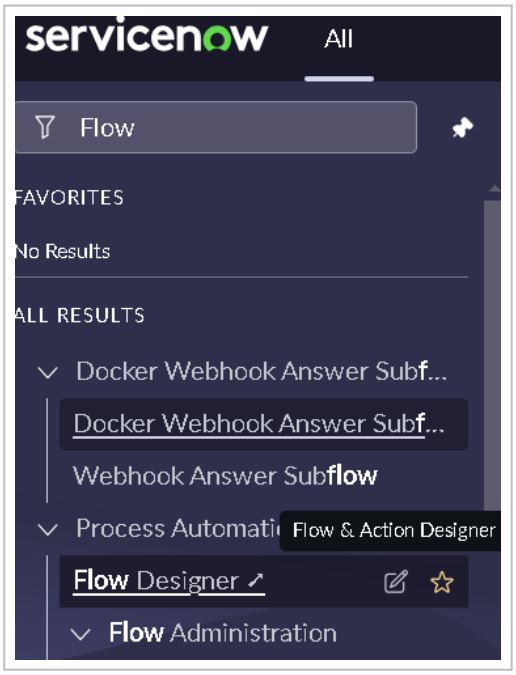

Figure 1: Opening Flow Designer from the All menu

4. In Flow Designer, click **New** and select **Flow**.

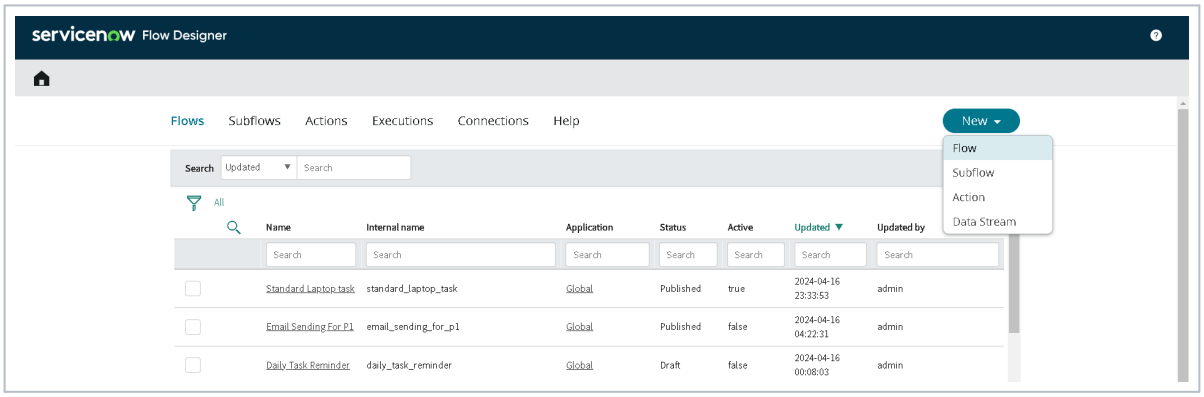

Figure 2: Creating a new Flow in Flow Designer

5. Under Flow properties, enter the Flow name as **Standard Laptop task**.
6. Set Application to **Global**.
7. Set Run As to **System User**.

8. Click **Submit**.

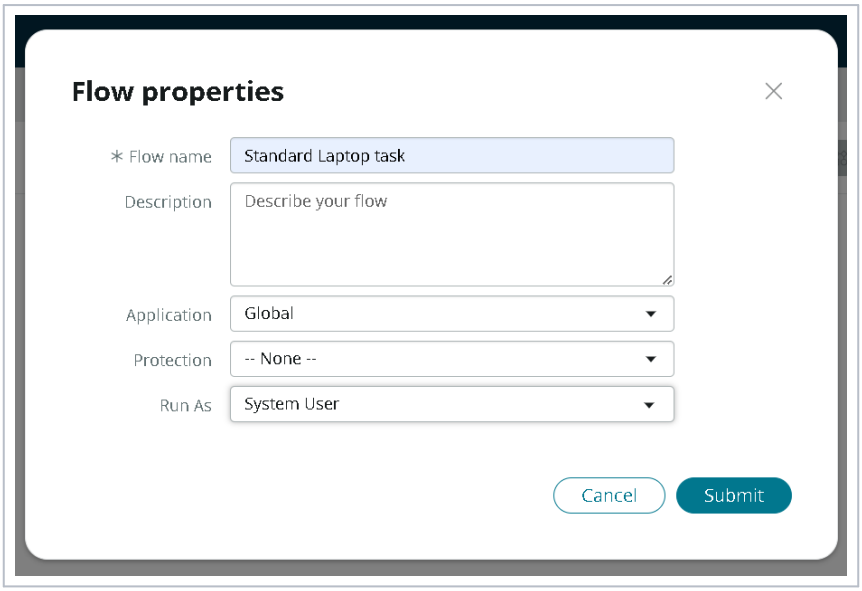

Figure 3: Flow properties

9. Click **Add a trigger**.
10. In the trigger list, search for **Service Catalog** and select it.

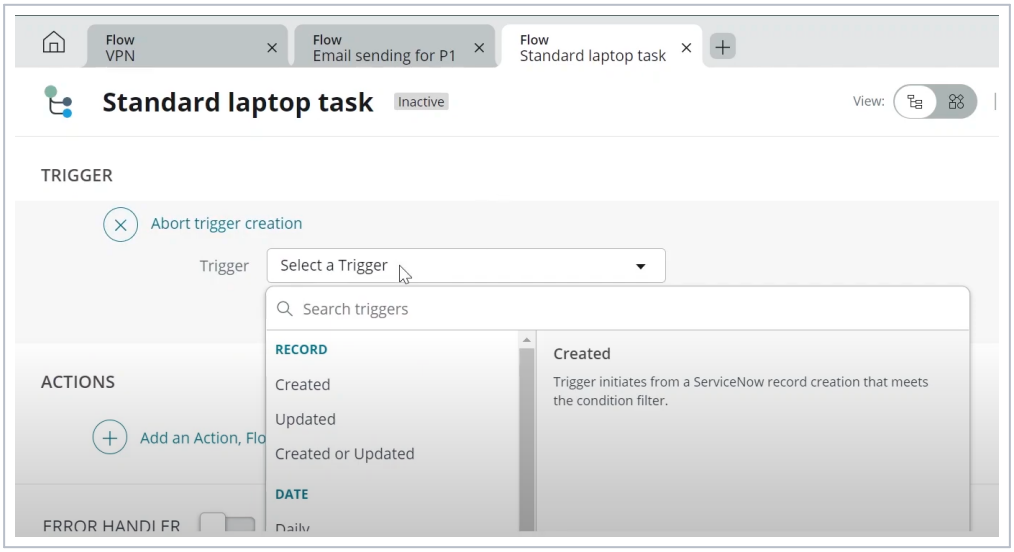

Figure 4: Selecting a trigger

11. Click **Done**.

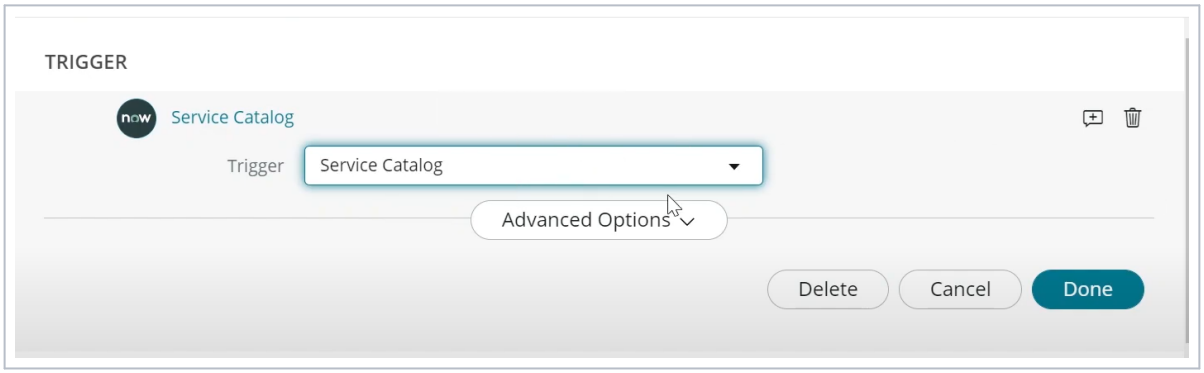

Figure 5: Service Catalog trigger configured

12. Under **Actions**, click **Add an action**.
13. Search for **Create Catalog Task** and select it.

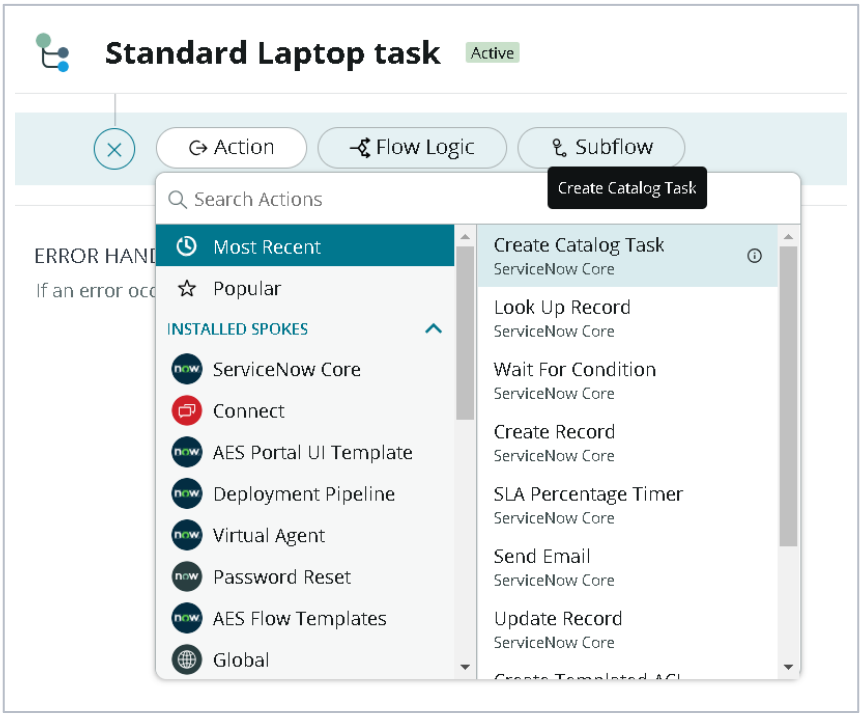

Figure 6: Selecting the Create Catalog Task action

14. Configure the action as follows: Action = **Create Catalog Task**.
15. Drag and drop the **Requested Item** record into the Requested Item field.
16. The table is auto-populated as **Catalog Task [sc_task]**.
17. Enter the Short description as **Laptop needs to Configured**.
18. Click **Add field value**.
19. Select the **Description** field and set its value to **Laptop needs to Configured**.
20. Select the **Assignment group** field and set its value to **Hardware**.
21. Select the **Approval** field and set its value to **Approved**.
22. Leave the remaining fields as default and click **Done**.

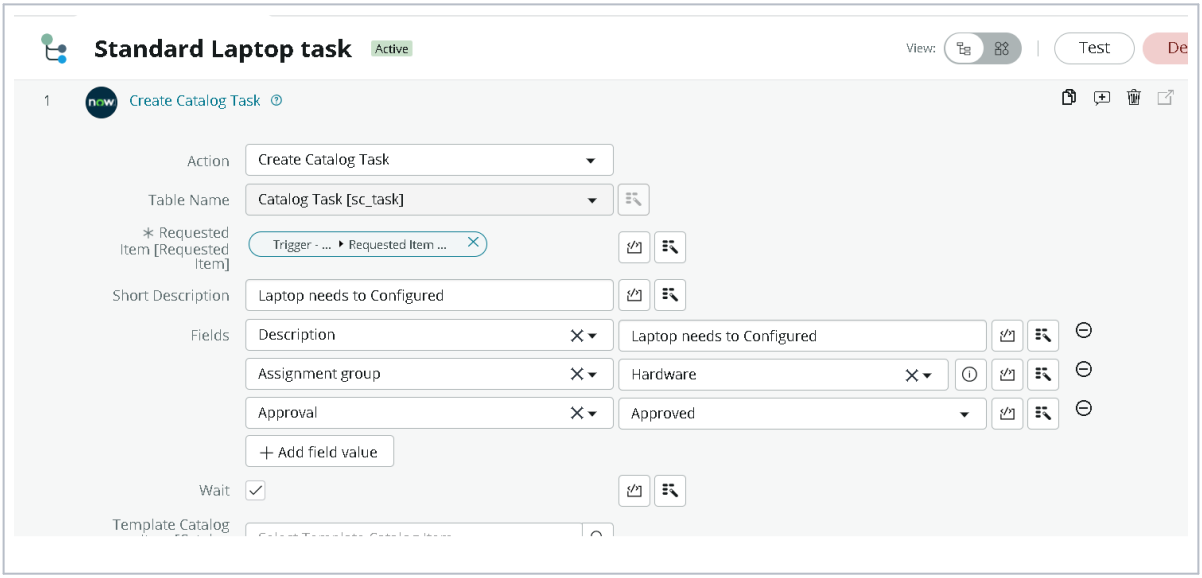

Figure 7: Create Catalog Task action configuration

23. Click **Save** to save the Flow.

24. Click **Activate**, then click **Activate** again in the confirmation dialog.
